## Career Objective

---

A Computer Science Engineering student seeking opportunities to apply programming and problem-solving skills in real-world applications. Passionate about software development and web technologies, with a strong willingness to learn and grow in a professional environment. Committed to continuous learning, teamwork and contributing effectively to organizational goals.

## Educational Qualification

---

### Under Graduation

Course: B.E. Computer Science and Engineering

Board /University: Anna University

College Name: Nehru Institute of Engineering and Technology

Period of Study: 2023 - 2027

Percentage /CGPA: 8.3

### 12<sup>th</sup>

State board of Tamilnadu

School Name: Vidhya vikashni matric higher secondary school

Period of Study: 2022 - 2023

Percentage /CGPA: 78%

### 10<sup>th</sup>

State board of Tamilnadu

School Name: Vidhya vikashni matric higher secondary school

Period of Study: 2020 - 2021

Percentage /CGPA: All pass

## Technical Skills

---

- Python, Java
- MS Excel
- MS PowerPoint
- HTML,
- Cybersecurity basics IoT basics

## **Certifications**

---

- IOT – IIT Madras NPTEL (2025)
- Python Data Structures – Coursera
- Introduction To Internet of Things – Coursera
- Google Data Analytics - Coursera
- Power Bi Data Analytics - Coursera

## **Internship**

---

- Hunar Intern - Java Development(2025)
- Cod Soft - Java programming(2025)
- Code Alpha - Java programming(2025)
- EDU Tantr – Data Analyst(on going)

## **Project**

---

### **Animal Healthcare System**

- Developed an AI-based system to detect animal diseases from uploaded images.
- Built the application using Python, TensorFlow, OpenCV, Flask, and MySQL.
- Used CNN (Convolutional Neural Network) for image-based disease prediction.
- Added image preprocessing and disease prediction with treatment recommendations.
- Improved early disease detection and maintained digital health records

### **Weather Prediction Using Machine Learning**

Technologies : Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Built a machine learning model to predict weather conditions using historical weather data.
- Performed data cleaning, exploratory data analysis (EDA), and feature engineering.
- Trained and evaluated the model using classification algorithms and performance metrics.

## **Declaration**

---

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

**Signature**
